- Social media

## PROFILE

I am a self-motivated, highly ambitious and result-oriented technical professional, who has a keen interest in web development/frontend development and UI/UX design.

I have recently graduated from Code Nation's Software Bootcamp & I am extremely passionate about exploring and learning more about new skills & technologies.

Earnestly focused on securing long-term employment to utilise my existing skills to develop a career in web development and advance my knowledge in the industry.

I am a friendly & approachable person and always happy to help others. I enjoy spending time with my family and friends.

## WORK EXPERIENCE

### *Code Nation*

#### SOFTWARE MASTER BOOTCAMP

Feb 2022-May 2022

- Worked with HTML5, CSS3 & JavaScript and built basic and responsive websites.
- Experience working with React.js and building responsive and interactive web applications.
- Practically involved with MongoDB and SQL to create a Database and used back-end technologies like Mongo Atlas & SQL workbench. I also used back-end frameworks and libraries such as Yargs Object, Mongoose, Sequelize and Express.js.
- Created Rest-API's and integrated back-end APIs with front-end by creating services and data repositories.
- Good understanding of software development life cycle.
- Performed in an Agile environment with Kanban, timesheets and Trello.
- Participated in pair programming and group collaborations to complete multiple web development projects and built MERN Stack responsive and interactive web applications.
- Operated with Figma, Netlify and Heroku also have a good understanding of version control like GitHub.
- Appointed & acted as a team leader in the final project and built the MERN stack Recipe app.

#### SOFTWARE DEVELOPER COURSE

Jan 2022-Feb 2022

- Worked with HTML and CSS and built a basic website.
- Worked with Python and built a text-based game.

### *Post Office*

#### ASSISTANT MANAGER

June 2020-Aug 2021

During this tenure, I performed multiple tasks and built a plethora of skills which proved to be very useful in taking my new assignment to the next level.

#### Customer Service

While in this position, I put demonstrated good customer service. As a result, I received numerous compliments from customers for efficient response to their queries & concerns and for providing prompt solutions to their problems.

# EDUCATION

---

## Code Nation Master Boot camp

Feb 2022-May 2022

- IT Level 4

## Develop Course

Jan 2022-Feb 2022

- IT Level 2

## Bolton College GCSE

- MATHS-C
- English-Level 3 pass

## GWCGK Pakistan FSC(Pre Engineering)

Sep 2007-July 2009

- Physics-C
- Chemistry-C
- Maths-C
- English-C

## GGHSSK Pakistan Matriculation Science

Sep 2006-July2007

- Physics-B
- Chemistry-C
- Biology-C
- Maths-A
- English-A

## Problem Solving

During this period, I demonstrated a customer-focused mindset by providing the best service possible and made certain client's instantaneous satisfaction. An example of this is when I introduced a setup that allowed customers to be fast-tracked if they had a query about their parcels and post. This arrangement reduced the waiting time & ensured that the correct staff member attended to each person.

## Adaptability

My job at the Post Office was my first ever job. However, I quickly acclimated to the new environment and new processes.

## Multitasking

In my busy shifts, I juggled managing cash, post, public sector, and retail while maintaining a conducive environment between my professional & personal life.

## Communication Skills

Simultaneously, my communication skills were further polished by customer interaction, heading my team, training new employees, and presenting a positive demeanour to staff and clientele.

## Reliability

By and large, my work was directly related to cash deposits & withdrawals, keeping records of all transactions as well as transferring cash from the local branch to the main Post Office on the quotidian, and a myriad of times received appreciation for flawless performance and task accomplishment.
